MEMORANDUM FOR: NSA/TCO

25X1A

ATTENTION :

THROUGH :

NSA/LO/NPIC

SUBJECT : Selected Radar Facilities in North Vietnam

REFERENCE : Requirement
NPIC Project No. 35007-5

1. In response to reference requirement, an analysis of photographic coverage of three radar sites near Tam Dao, Ha Tinh, and Trung Kien, North Vietnam, was accomplished on

25X1D

2. Tam Dao radar site is located 0.5 nm north of Tam Dao and 17.5 nm NNW of Phuoc Yen Airfield at 21-27N/105-39E. The site contains one SCR-270 early warning radar, one control building, and five small support buildings. No communications equipment observed within the area. The installation is served by a single lane, natural surface road from Tam Dao.

3. Ha Tinh radar site is located 1.0 nm SSE of Ha Tinh at 18-19N/105-55E. The site contains one SCR-270 early warning radar, three support buildings, two AW/AA positions, and is served by a single lane natural surface road from Ha Tinh.

4. Trung Kien area radar site is located 1.7 nm west of Trung Kien and 9.8 nm north of Vinh at 18-51N/105-42E. The site contains two unidentified probable radars, six support buildings (four revetted) and at least two AW/AA positions. Three large and three small support buildings are located immediately south of the sites. Poor quality photography precludes determination of mensuration characteristics. A single lane, natural surface service road connects the site with Route 1.
